## ZANTECH COATED PISTOL BULLETS

Premium Coated Pistol Bullets  
Unmatched Performance. Exceptional Precision.

### Consistent Weights

Uniform weight for better accuracy shot after shot.

### Low Friction

Smother performance with less friction than plated or FMJ bullets.

### Pressed Lead Core

Strong, stable core for reliable performance.

### No Barrel Fouling

Shoot longer with minimal cleaning.

### No Jacket Fragmentation

Advanced coating prevents jacket break-up.

### Reduced Powder Usage

Achieve the same velocity with less powder, saving you money.

### Rounded Base

No case snagging—ensures flawless feeding.

### Smokeless & Clean

Reduced smoke for a cleaner shooting experience.

Smokeless coat  
Fully coated / No lead exposure  
Case friction compared to copper plated/FMJ, less powder for same speed  
Case friction compared to copper plated/FMJ, less powder for same speed  
Beveled lead core  
No jacket fragmentation

WARNING: This product can expose you to chemicals including lead, which is known to the State of California to cause cancer and birth defects or other reproductive harm.

Types Weights Diameter

Round nose 125 / 135 / 145 356

Flat nose 125 / 135 / 145 356

Hollow point 125 / 135 / 145 356

## Introducing the Pellet Sizer

### Zan Projectiles Pellet Sizer

A groundbreaking tool designed to optimize the fit of your airgun pellets. This unique product allows you to independently adjust both the head size and skirt size of your pellets, ensuring a perfect match to your barrel for unparalleled accuracy. With the ability to change dies for the head and skirt in just seconds, you can fine-tune your pellets for every shot, without any hassle. The Zan Projectiles Pellet Sizer offers unmatched precision, giving you the power to customize your ammunition like never before.

#### .177 caliber

Head size:  
4.49 mm  
4.50 mm  
4.51 mm  
4.52 mm

Skirt size:  
4.67 mm  
4.65 mm  
4.62 mm  
4.60 mm

#### .22 caliber

Head size:  
5.50 mm  
5.51 mm  
5.52 mm  
5.53 mm  
5.54 mm

Skirt size:  
5.69 mm  
5.66 mm  
5.64 mm  
5.61 mm  
5.59 mm

#### .25 caliber

Head size:  
6.33 mm  
6.34 mm  
6.35 mm  
6.36 mm  
6.37 mm  
6.38 mm

Skirt size:  
6.68 mm  
6.60 mm  
6.63 mm  
6.60 mm  
6.58 mm

## Introducing Hyper Line Slugs

The next evolution in high-performance airgun ammunition.

ELR .22 HYPER LINE

These slugs are engineered with a cutting-edge anti-friction coating, drastically reducing drag within the barrel for smoother, faster shots. The advanced lubricant additive ensures superior velocity, delivering enhanced performance right out of the box. Hyper Line slugs are uniquely designed to leave no residue in the barrel, keeping it clean after every shot. A clean barrel eliminates any point of impact shifts, ensuring consistent accuracy throughout your competition.

HP SLUG HYPER LINE

The fluorescent color of the Hyper Line slugs is a game-changer. You can easily track the slug in flight, allowing you to read wind conditions with unmatched precision. In the event of a miss, the visible trajectory lets you quickly adjust for wind correction, enabling a faster follow-up shot and increasing your chances of a hit. Free from lead flashes and dirt, these slugs provide a cleaner, more reliable shooting experience.

Experience the future of precision and power with Hyper Line – Hyper performance, every shot.

- All ELR .22 and .25 slugs:  
 .177 slugs 10, 13 and 16 grains  
 .217 caliber slugs 20, 23, 30.5, 33 and 40 grains  
 .218 caliber slugs 20, 23, 30.5, 33, 36 and 40 grains  
 .25 caliber slugs 33, 37, 41 and 45 grains  
 .30 caliber slugs 59 and 68 grains  
 .35 caliber slugs 100 and 125 grains

## ELR .22 and .25 Slugs

If you want the ultimate in long range performance then look no further than the slugs in this category!

Designed and built for higher power airguns with superior ballistics in mind, these slugs have unmatched ballistic performance. Whether you are a serious competition shooter or a long range hunter these are the slugs for you!

Having a larger Cross sectional density results in these slugs also having a very high Ballistic coefficient which help reduce aerodynamic drag and minimise wind deflection.

These slugs have been designed for high power air rifles at velocities between 850 -1000fps and with a Ballistic coefficient ranging between 0.170 up to 0.255 (Subject to chosen slug, velocity and environmental conditions) these are the ultimate in long range performance.

ELR .22 / 35 grain ..... 200 pcs, bc tba  
 ELR .25 / 43.5 grain ..... 200 pcs, bc .234 at 938fps

ELR .25 61 grain ..... 200 pcs, bc .255 at 930 fps

## .25 FAT BOY

The Fat Boy .25 pellet has landed. For high and lower power rifle systems the Fat Boy has the perfect ballistic capabilities for short, medium and longer range hunting and competition situations.

With precision hand selected quality pellets combined with our individually packed ammunition trays, this completely illuminates the need to "sort your pellets" with confidence they will shoot as good as they look!

NEW PRODUCT
